Abstract: Mixed reality (MR), sometimes referred to as hybrid reality is the merging of real and virtual worlds to produce new environments and visualizations where physical and digital objects co-exist and interact in real time. Mixed reality takes place not only in the physical world or the virtual world but is a mix of [reality](#) and [virtual reality](#), encompassing both [augmented reality](#) and [augmented vitality](#) via [immersive technology](#). Though there is a vast application of MR but in his submission focus will be primarily on two important sector healthcare and education.
